WHAT WE DO

North Cal reclaims, remanufactures, markets and distributes a complete line of reclaimed and recycled lumber products, both direct and online.

HOW WE DO IT

We deconstruct industrial sites, water tanks, homes, etc. in a safe and efficient manner, recycling up to 90% of the material.

We also reclaim redwood “buckskin” logs cut from local forests decades ago.

All woods remanufactured at our Ukiah, CA facility.

WHY WE DO IT

Reduce Lumber Waste In Landfills; Repurposed 10M BF since 2006.

Reduce Carbon Footprint; Save Trees, Lower Emissions Associated With Cutting New Wood

Better Quality For Our Customers

Because It's The Right Thing To Do!

Around 270,000 homes torn down annually in U.S.

Most of the debris goes to dumps or landfills, according to the EPA.

That equals a staggering 1 billion b.f. of timber, enough to make tens of thousands of new homes!
