

Landfill Dzine®

From the Field to Fashion

A&J Industrial

- A&J Was founded in 2007
- We were one of the first recycling companies in central California to focus on the Agriculture recycling needs
- We began to educate growers on various recycling programs

Examples of material we help growers recycle

Lay Flat Irrigation Hose

- Lay flat is used to irrigate many different fields in throughout California.
- Many of our vegetables and fruits are irrigated with the use of Lay flat.
- Made of 3 different materials Rubber, Nylon and Polypropylene.
- Can't be recycled by any currently known technology.
- Goes directly to landfills in California

This is where Lay Flat
Irrigation hose is
discarded

Used Hose

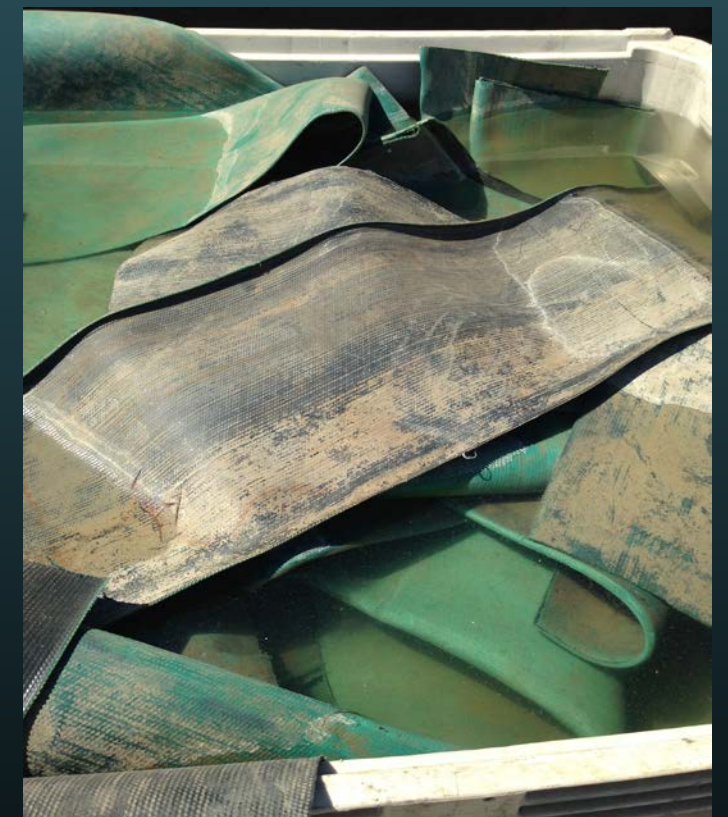

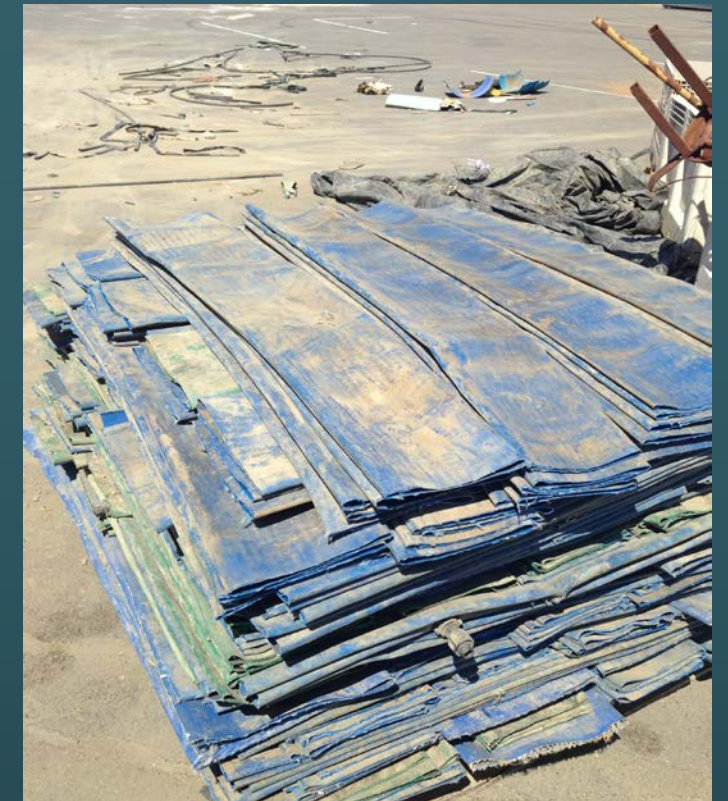

- Once the life cycle of the hose has been reached, growers need to replace the hose.
- Usually has been in the field for to 5 to 10 years
- Dirty, Sun damaged

Our first
prototype bags

Process, From Fields to Fashion the birth of
Landfill Dzine®

Items we produce

- Handbags
- Flip flops
- Belts
- Dog collars
- Wallets
- Make up Bags
- Bracelets

Barriers we have faced throughout our journey

- We are not a named brand
- Already have filled their eco friendly product quota
- Getting our story out
- The high cost to manufacture
- No experience in this market place (we are a recycling company)
