

The background of the slide is a photograph of a recycling facility. In the foreground, there is a large, messy pile of crumpled white paper and some colorful plastic debris. In the background, there are several large, neatly stacked bales of compressed cardboard. The sky is a clear, bright blue. A semi-transparent green rectangular box is overlaid in the center of the image, containing the main title text.

Global Changes to Recycling Markets and California

Evan Johnson
Science and Policy Advisor
CalRecycle

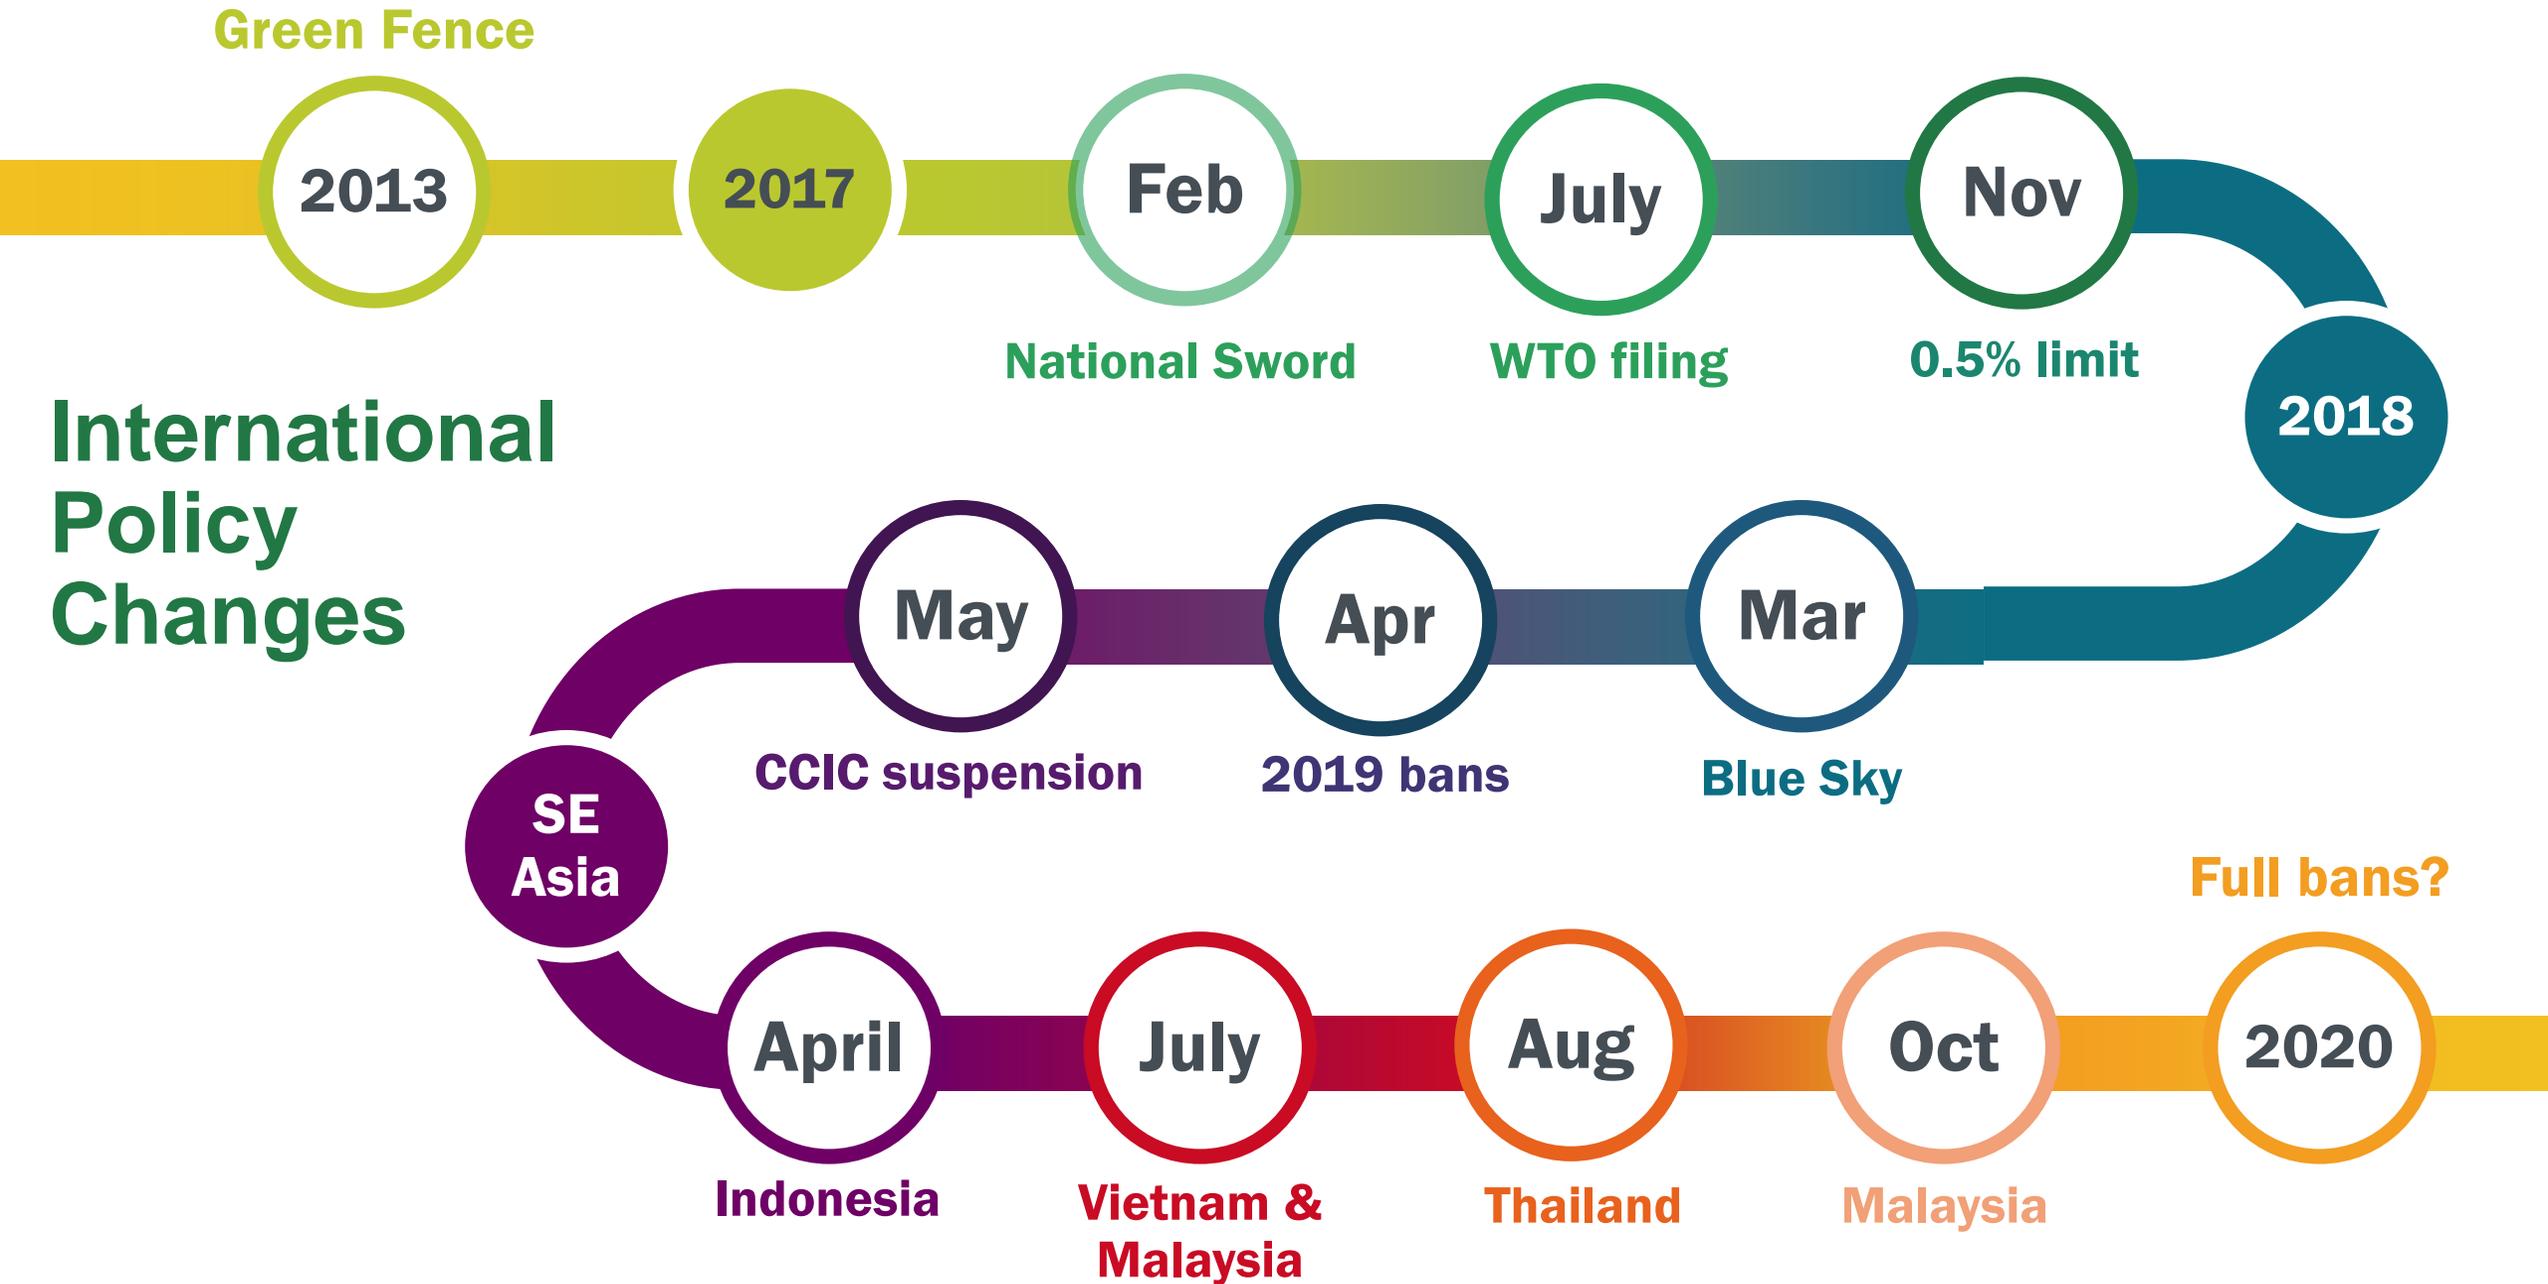

2/3 of what we toss in our blue bins was exported

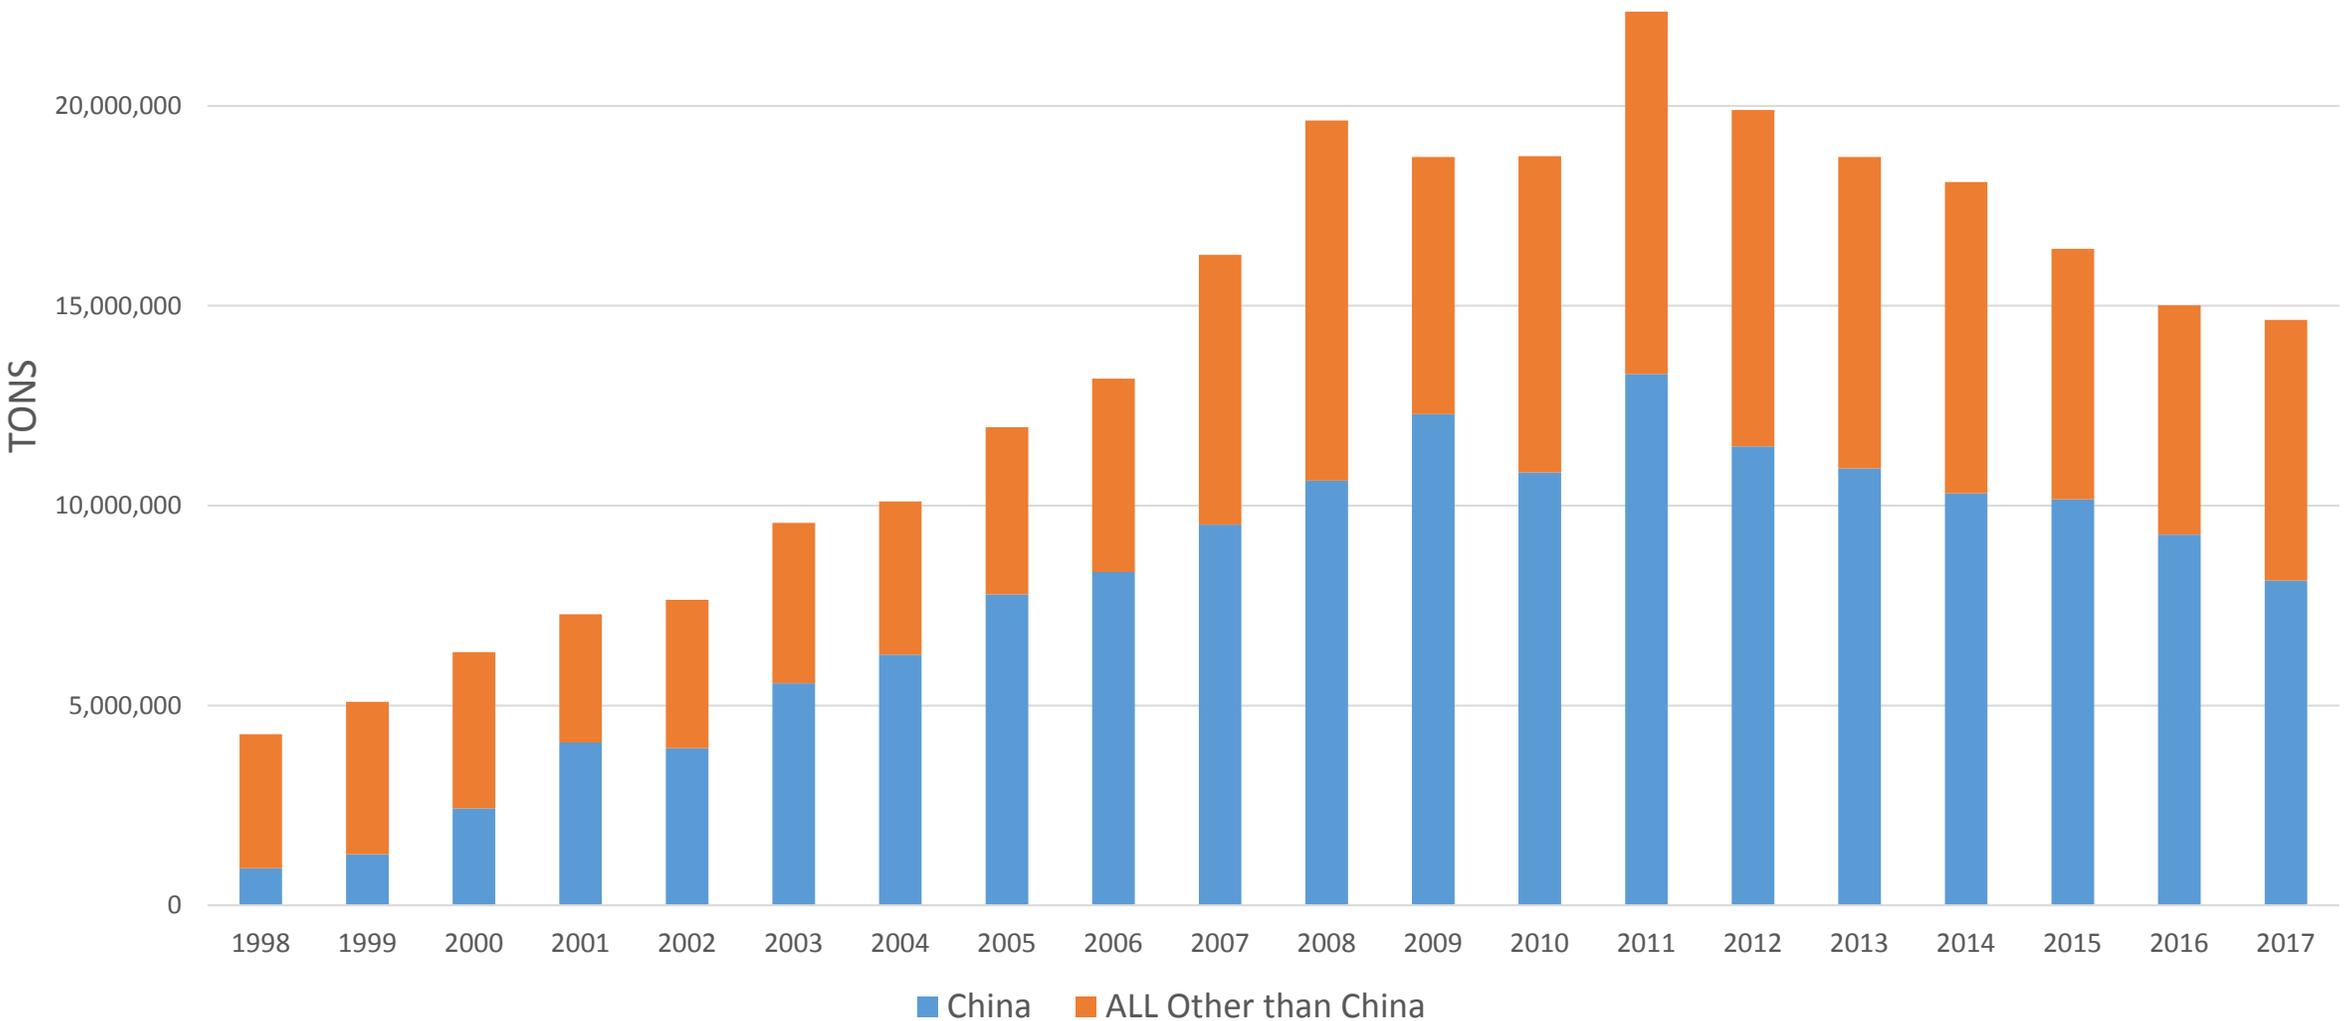

62% of what was exported went to China

Estimated 76.5 million tons generated – AB 341

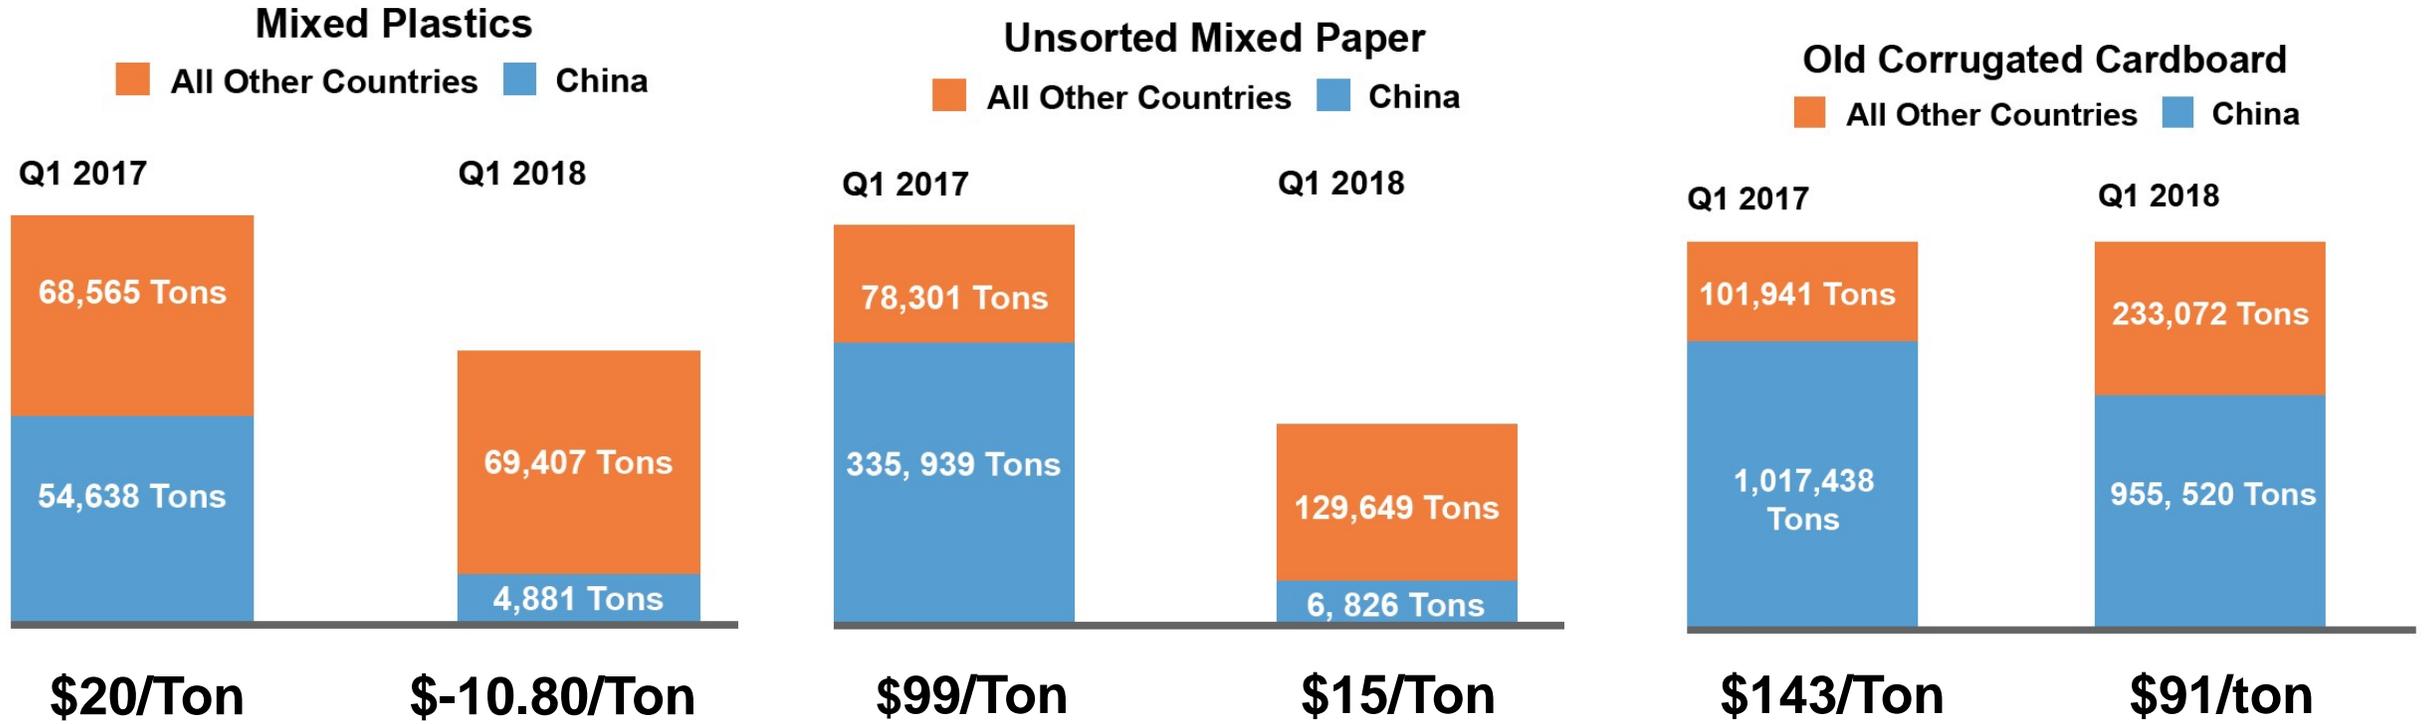

International Policy Changes

Export of CA Recyclable Commodities 1998-2017

Change in Export Quantities by Material Type
